DIFFUSE METAL HALIDE KITS

Reduce glare and light pollution and provide 360-degree lighting with new diffuse metal halide conversion kits. One light kit provides coverage of approximately 42,279 ft² (3,928 m²) at a minimum of 0.5 foot candles (ft-c), while reducing the unpleasant glare produced by traditional metal halide floodlight fixtures.

APPLICATIONS

- Road Construction
- Oil Field Operations
- Outdoor Events
- Applications requiring 360-degree lighting

DURABLE

The rigid aluminum frame is very durable and lightweight, with a polymer lens designed to withstand all weather conditions. The impact resistant polymer material is robust and long-lasting, as compared to traditional glass lenses and fabric balloon lighting solutions.

Diffuse fixture with (4) metal halide bulbs inside.

EASY INSTALLATION

The diffuse light fixture kit installs in a matter of minutes, minimizing downtime and labor costs. All hardware needed for the installation is included, with no welding required. Wiring is equally convenient. The diffuse light fixture uses four (4) 1000-1250 watt metal halide bulbs, with no need to modify or bypass breakers or ballasts.

WITH DIFFUSE METAL HALIDE KIT

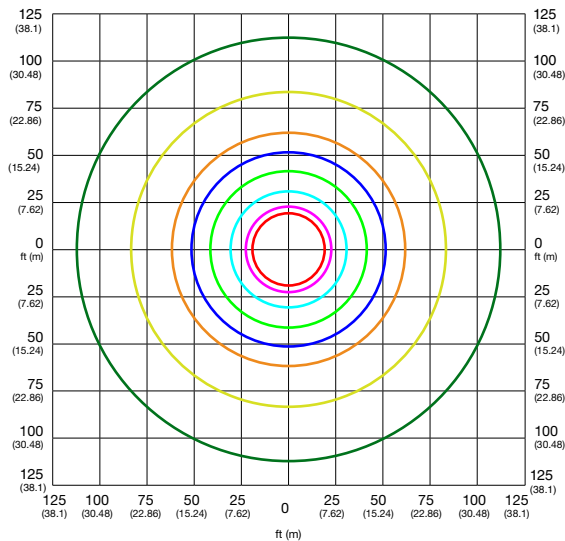

SPECIFICATIONS

FIXTURE SPECIFICATIONS

Lamp Type	BT37
Lamp Socket Type	E39 - (4) Sockets

DIFFUSE METAL HALIDE COVERAGE
 23-ft (7 m) mast height
 4 - 1,000w metal halide bulbs

Area covered: 42,279 ft² (3,928 m²)
 at minimum of 0.5 foot candles (ft-c)

30 Foot Candles	3 Foot Candles
20 Foot Candles	2 Foot Candles
10 Foot Candles	1 Foot Candles
5 Foot Candles	0.5 Foot Candles

360° LIGHT COVERAGE

Compared to the directional lights of traditional light tower fixtures, diffuse light kits distribute light evenly from the light tower- a full 360-degrees.
